

The Model 1900 Polarographic Amplifier is specifically designed for low noise, precise amperometric measurements. The features of this research instrument easily permit the use of a wide range of commercial or custom polarographic oxygen or hydrogen sensors.

Sepecifications:

- o Low noise
- o Can use both Hydrogen and Oxygen sensors
- o Wide response range
- o Excellent resolution
- o Full scale digital panel meter displays current, mmHg, x10, %, %x10 outputs
- o Internal/external gateable electrode polarization
- o Single-ended or differential measurement
