

## Bath Chamber Units Luigs & Neumann

### Preassembled Units Carrying a Bath Chamber

These LN units consist of Mini 23 micromanipulators combined with the necessary adapters. A unit allows the individual movement of the bath chamber and makes it possible to swing the bath chamber out of the workspace. Bath chamber Units are available as motoric or manual versions. The design of the units combines flexibility with stability, high resolution and absence of drift. All mechanical components are equipped with earthing sockets.

### Specifications

|                           |                    |
|---------------------------|--------------------|
| <b>Traverse Path</b>      | X/Y/Z = 20 mm      |
| <b>Motor Resolution</b>   | 9.8 nm             |
| <b>Reproducibility</b>    | < 1 $\mu$ m        |
| <b>Dimensions (LxWxH)</b> | 151 x 151 x 120 mm |
| <b>Weight</b>             | 1.9 kg             |
| <b>Spindle Lead</b>       | 0.5 mm per rot.    |
